

GRP Tanks & Expansion Joints

Corrosion-Resistant GRP Solutions | Thermal & Movement Joints

Expert Power Building Materials Trading LLC, UAE is a leading provider of high-quality fiberglass-reinforced plastic (GRP) tanks and expansion joints designed for superior durability and performance. Our expansion joints, including floor-to-floor, wall-to-wall, and floor-to-wall cover joints, ensure seamless movement and protection in demanding environments. With a focus on innovation and precision, we deliver solutions that enhance structural integrity, safety, and longevity across industrial and construction applications.

Backed by years of expertise, we prioritize advanced engineering and stringent quality standards to meet the evolving needs of our clients. GRP tanks offer corrosion resistance, lightweight strength, and customizable designs, while our expansion joints provide reliable stress relief for surfaces. Whether for water storage, chemical containment, or infrastructure projects, our products are built to excel.

Customer satisfaction drives our commitment to continuous improvement and tailored solutions. From design to installation, GRP Tanks & Expansion Joints ensures excellence at every step, making us the preferred choice for engineers, contractors, and developers in UAE.

GRP TANKS

Innovative Water Storage Solutions

GRP (Glass Reinforced Plastic) are engineered for superior strength, durability, and resistance to corrosion, making them ideal for storing water, chemicals, and other liquids. Made from high-quality composite materials, GRP tanks offer a long-lasting, maintenance-free solution for industrial, commercial, and residential applications.

Features & Advantages

- ✓ **4-Layer Insulation**
GRP + 40mm polyurethane foam + non-woven fabric for freeze/condensation resistance.
- ✓ **Hygienic & Safe**
Non-toxic, non-leaching, and compliant with potable water standards.
- ✓ **Corrosion-Resistant**
Unlike steel or concrete, GRP does not rust or degrade when exposed to harsh chemicals or weather conditions.
- ✓ **Lightweight & Easy to Install**
Significantly lighter than traditional materials, reducing transportation and installation costs.
- ✓ **Long Lifespan**
Resistant to UV rays, extreme temperatures, and chemical erosion for decades of reliable use.

Applications

Potable water storage | Firefighting systems | Industrial process water | Agriculture | HVAC
Municipal projects | Remote industrial projects

GRP TANKS

Specifications & Setup

Certifications & Compliance

WRAS Certified

Safe for potable water storage.

UV-Resistant

Outer layer prevents degradation.

Seismic & Wind Load Rated

$KH = 1/3G$ earthquake resistance;
60 m/sec wind speed.

Performance Data

Tensile Strength

102 MPa (vs. industry standard 60 MPa).

Flexural Strength

150 MPa (vs. 80 MPa standard).

Thermal Conductivity

2.0×10^5 (superior insulation)

Setup & Installations

Concrete base & base panel assembly

Wall panel assembly

Roof & support assembly

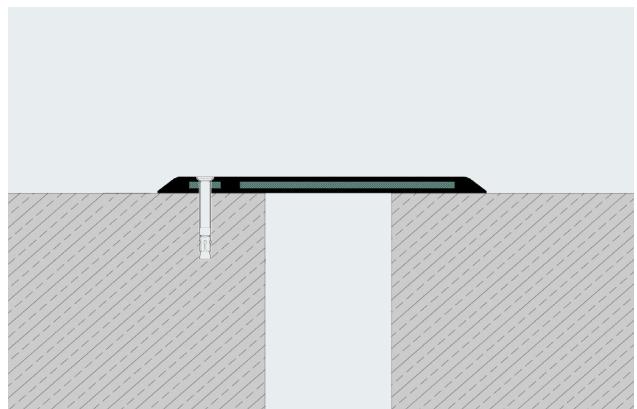

Final GRP Tank placement

EXPANSION JOINTS

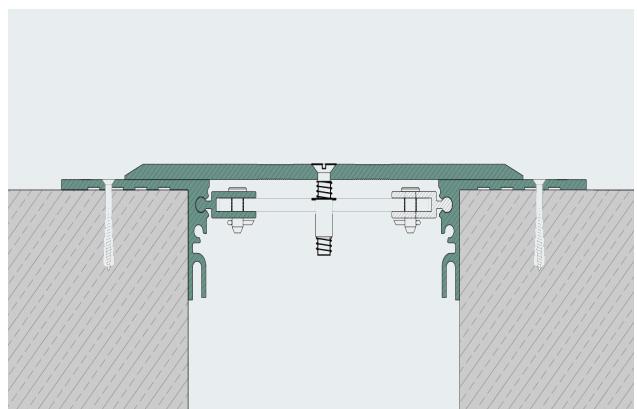

Embedded & Surface Mounted Joints

Embedded & surface-mounted expansion joints absorb structural movements, preventing cracks. Ideal for floors, walls, and pavements, they ensure durability and flexibility in construction. Available in various materials for seamless integration.

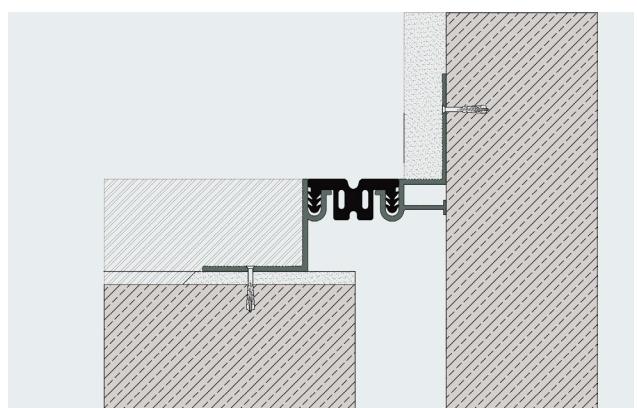

Surface Mounted Expansion Joints

Surface Mounted All Metal Joint

Embedded Expansion Joint

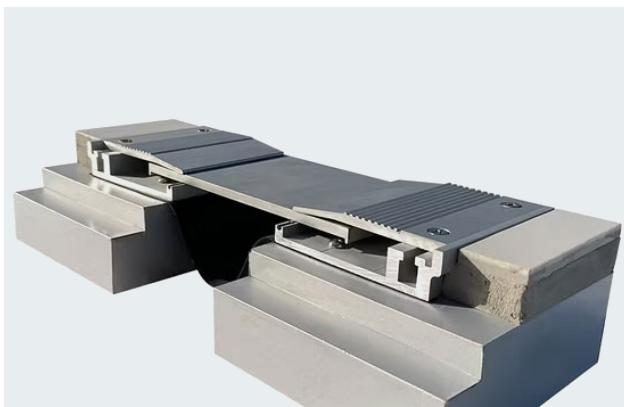

EXPANSION JOINTS

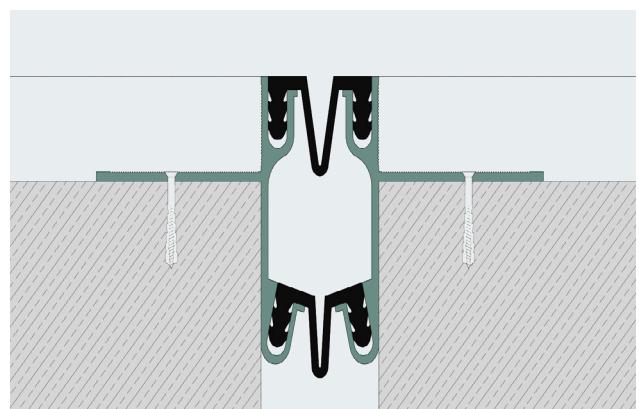

Sliding & Recess Joints

Sliding & recess expansion joints accommodate structural movement in floors and walls. Designed for heavy loads, they ensure smooth transitions, durability, and crack prevention in industrial and commercial applications.

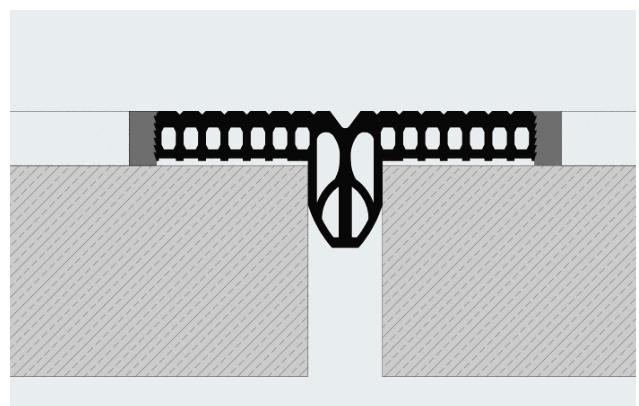

Sliding Cover Expansion Joints

Wall to Wall Recess Mounted Joint

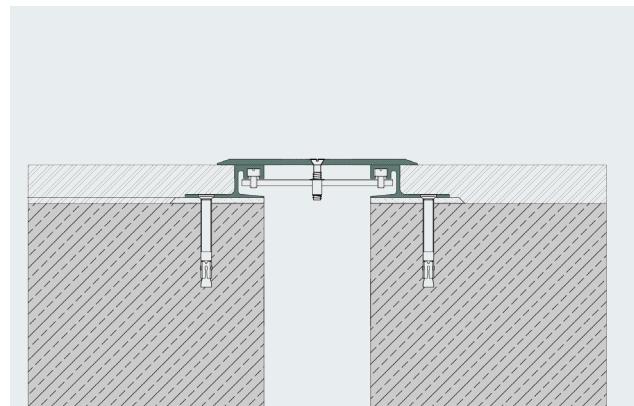

Waterproof Expansion Joints

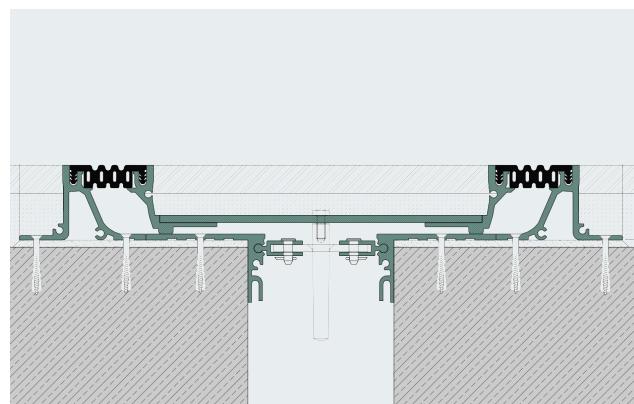

SEISMIC EXPANSION JOINTS

Seismic Cover Joints

Seismic Expansion Joint

Floor Finish Seismic Expansion Joint
